REASONS FOR ALLOWANCE

1. The following is an Examiner's statement of reasons for allowance:

The applicant has claimed a method for regeneration of articular cartilage comprising administering an osteochondral graft having applied thereto a composition consisting essentially of for example BMP-2 and BMP-12. Further applicant has set forth on the record that the graft is coated with said BMP protein. A search of commercial databases produced references that teach (Henk et al., Osteoarthritis and Cartilage, 1998, vol. 6, pages 306-317) a method utilizing BMP-2 to repair or regenerate articular cartilage and surgical procedures using osteochondral grafts (see Outerbridge et al., JBJS, 1995, vol. 77, pages 65-72), however the references were silent on the use of an osteochondral graft with a BMP applied thereto. The art recognizes that bone morphogenetic proteins (BMP) are members of a family of transforming growth factors with approximately 15 different BMPs, all with varying degrees of cartilage and/or bone inductive properties, therefore the claimed invention is neither anticipated or obvious in view of the disclosure in the art. Thus, the claimed invention is novel and nonobvious over the prior art of record.
